A NEW WALKING EXPERIENCE - ON EUROPE'S FIRST PATHS

Discover the new Wanderlust here, in the Land of Hermann. A unique European walking centre is being created here in the midst of the Teutoburg Forest hiking region in 2015, which aims to make walking into an even more valuable experience. **This is where Europe's first paths cross: the European cycle route R1 and the E1 European long distance path.**

A new highlight at the Hermann Monument

With a modern centre in easy reach of the crossroads of these European paths, WALK is creating a central place where walking fans from all over Europe can get information, share stories and highlight all kinds of hiking issues together.

You can already experience nature, culture, wellness and history on the excellent hiking trails around the developing walking centre. You can also look forward to our new attractions and active walking trails. Right in the heart of Europe, in the Lippe health region.

LIPPE IS WHERE WALKING, TRAILS AND KNOWLEDGE CONVERGE

Tens of thousands of walkers a year enjoy the hiking country in the Lippe region due to its picturesque mountain landscape, rich nature and culture and wealth of health and wellness destinations. In the future, not only people and paths will come together here from all across Europe, but also skills from all sectors of walking.

Connecting people and paths

The new WALK centre will not only connect paths with each other, but also walkers, walking organisations, bodies and institutions. As a Europe-wide skills centre, it is meant to serve as an information point and a meeting place, as well as the further development of walking issues: as a venue for presentations, workshops and conferences.

Enjoy a place perfect for experiencing nature and health and wellness services. And somewhere people can help shape the future of walking. Completion is due in autumn 2015.
